In his reinterpretation, migration becomes the organizing principle for rewriting the history of preindustrial North America. His approach rests on four separate propositions. The first of these asserts that residents of early modern England moved regularly about their countryside; migrating to the New World was simply a "natural spillover." Although at first the colonies held little positive attraction for the Englishthey would rather have stayed home-by the eighteenth century people increasingly mi-grated to America because they regarded it as the land of opportunity. Secondly, Bailyn holds that, contrary to the notion that used to flourish in America history textbooks, there was never a typical New World community. For example, the economic and demographic character of early New England towns varied considerably. Bailyns third proposition suggests two general patterns prevailing among the many thousands of migrants : one group came as indentured servants, another came to acquire land. Surprisingly, Bailyn suggests that those who recruited indentured servants were the driving forces of transatlantic migration. These colonial entrepreneurs helped deter-mine the social character of people who came to preindustrial North America. At first,

thousands of unskilled laborers were recruited; by the 1730s

, however, American employers demanded skilled artisans. Finally, Bailyn argues that the colonies were a half civilized hinterland of the European culture system. He is undoubtedly correct to insist that the colonies were part of an Anglo-American empire. But to divide the empire into English core and colonial periphery, as Bailyn does, devalues the achievements of colonial culture. It is true, as Bailyn claims, that high culture in the colonies never matched that in England. But what of seventeenth-century New England, where the settlers created effective laws, built a distinguished university, and published books? Bailyn might respond that New England was exceptional. However, the ideas and institutions developed by New England Puritans had powerful effects on North American culture. Although Bailyn goes on to apply his approach to some thousands of indentured servants who migrated just prior to the revolution, he fails to link their experience with the political development of the United States. Evidence presented in his work suggests how we might make such a connection. These indentured servants were treated as slaves for the period during which they had sold their time to American employers. It is not surprising that as soon as they served their time they passed up good wages in the cities and headed west to ensure their personal independence by acquiring land. Thus, it is in the west that a peculiarly American political culture began, among colonists who were suspicious of authority and intensely antiaristocratic. 1. Which of the following statements about migrants

to colonial North America is supported by information in the passage? (A) A larger percentage of migrants to colonial North America came as indentured servants than as free agents interested in acquiring land. (B) Migrants who came to the colonies as indentured servants were more successful at making a livelihood than were farmers and artisans. (C) Migrants to colonial North America were more successful at acquiring their own land during the eighteenth century than during the seventeenth century. (D) By the 1730s, migrants already skilled in a trade were in more demand by American employers than were unskilled laborers. (E) A significant percentage of migrants who came to the colonies to acquire land were forced to work as field hands for prosperous American farmers. 2. The author of the passage states that Bailyn failed to (A) give sufficient emphasis to the cultural and political interdependence of the colonies and England (B) describe carefully how migrants of different ethnic backgrounds preserved their culture in the United States (C) take advantage of social research on the experiences of colonists who migrated to colonial North America specifically to acquire land (D) relate the experience of the migrants to the political values that eventually shaped the character of the United States (E) investigate the lives of Europeans before they came to colonial North America to determine more adequately their motivations for migrating 3. Which of the following best summarizes the authors evaluation of Bailyns fourth pro-position? (A) It is totally implausible. (B) It is partially correct. (C) It is highly admirable. (D) It is

controversial though persuasive. (E) It is intriguing though unsubstantiated. 100Test 下载频道开通,各类考试题目直接下 载。详细请访问 www.100test.com
