Title:Globe Shortage of Fresh Water B. Word Limit: about 200

words C. Your composition should be based on the Outline given in

Chinese below: 1. 人们认为淡水是取之不尽的（提示：雨水，

河水，井水） 2. 实际上淡水是短缺的（提示：人口增加，工

业用水增加，污染严重） 3. 我们应当怎么办（提示：节约用

水，开发新水源） 例文： Global Shortage of Fresh Water People

often think that water will never be used up. There is plenty of water,

such as rain, water from the rivers and wells. It seems as if water is

always available around us and we never have to worry about water

shortage. In fact water is rather limited on the earth. With the rapid

increase of population and fast development of industries, water is

more needed than before. At the same time, a large amount of water

has been polluted and wasted every day. Some big cities in China are

facing the problem of water shorage already. There, water supply is

controlled and industry has been restrained. What should we do

about the water shorage? I think, first, the people should be made

aware of the real situation about the water. Everyone should

consciously save on water and certain law should be made that no

water will be polluted. We have to protect the existing water

resources and develop new ones. In this way I believe that our cities

will not be thirsty for water in the future. 100Test 下载频道开通，
