， 偏向B级 Medical Journals Medical journals are publications that report medical information to physicians and other health professionals . In the past , these journals were available only in print . With the development of electronic publishing , many medical journals now have Web sites on the Internet , and some journals publish only online . A few medical journals , like the Journal of the American Medical Association , are considered general medical journals because they cover many fields of medicine . Most medical journals are specialty journals that focus on a particular area of medicine . Medical journals publish many types of articles . Research articles report the results of research studies on a range of topics varying from the basic mechanisms of diseases to clinical trials that compare outcomes of different treatments . Review articles summarize and analyze the information available on a specific topic based on a careful search of the medical literature . Because the results of individual research studies can be affected by many factors , combining results from different studies on the same topic can be helpful in reaching conclusions about the scientific evidence for preventing , diagnosing or treating a particular disease . Case conferences and case reports may be published in medical journals to educate physicians about particular illnesses and how to treat at them . Editorials in medical journals are short essays that

express the views of the authors , often regarding a research or review article published in the same issue . Editorials provide perspective on how the current article fits with other information on the same topic . Letters to the editor provide a way for readers of the medical journal to express comments , questions or criticisms about articles published in that journal .

1 . The main readers of medical journals are A)the general public . B)health professionals . C)medical critics . D)news reporters .

2 . Which of the following statements is NOT true? A)Many medical journals also publish online . B)A few medical journals are general medical journals . C)Most medical journals publish only online . D)Most medical journals are specialty journals .
