

提高效率巧用脚本配置思科路由器 PDF转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/252/2021_2022__E6_8F_90_E9_AB_98_E6_95_88_E7_c101_252821.htm 首先：要明确自己想要进行那些操作，执行那些命令，然后进行脚本的编写。例

：我要进行running-configure配置的备份操作，当然，设备早已经配置好了，tftp服务器也准备好了。路由器配置如下

```
username ccie privilege 15 password 0 ccie!interface
FastEthernet0/0no ip addressshutdownduplex autospeed
auto!interface FastEthernet0/1ip address 11.133.183.251
255.255.255.0duplex autospeed auto!ip classlessip route 0.0.0.0
0.0.0.0 11.133.183.254ip http serverip pim bidir-enable!line vty 0
4login local 那么可以按照下面的步骤进行：1、编写脚本：新建一个文件crt.vbs，尾缀为.vbs，内容如下：#$language =
"VBScript"#$interface = "1.0"Sub main turn on synchronous mode
so we dont miss any datacrt.Screen.Synchronous = TrueOn Error
Resume Nextcrt.session.Connect("/telnet 11.133.183.251")If
Err.Number0 Thencrt.session.Connect("/telnet
11.133.183.251")End Ifcrt.Screen.WaitForString
"Username:"crt.Screen.Send "ccie" amp.
VbCrcrt.Screen.WaitForString "Router#"crt.Screen.Send "config t"
amp. VbCrcrt.Screen.WaitForString
"Router(config-if)#"crt.Screen.Send "no sh" amp.
VbCrcrt.Screen.WaitForString "Router#"crt.Screen.Send "copy run
tftp://11.133.183.249" amp. VbCrcrt.Screen.WaitForString
"Destination filename [router-config]"crt.Screen.Send ""amp.
```

VbCrcrt.session.disconnectcrt.Screen.Synchronous = FalseEnd Sub
