E5_c97_260791.htm ACC2000: "Overflow" Error Message When
You Try to Upsize to SQL Server 2000 The information in this article
applies to: Microsoft ACCESS 2000 This article was previously
published under Q272384 Moderate: Requires basic macro, coding,
and interoperability skills. This article applies to a Microsoft Access
database (.mdb) and to a Microsoft ACCESS project (.adp).
SYMPTOMS When you try to upsize a Microsoft ACCESS 2000
database to Microsoft SQL Server 2000, you may receive the
following error message: Overflow RESOLUTION Office 2000
Service Pack 3 To correct this problem, obtain the latest service pack
for Microsoft Office 2000. For additional information, click the
following article number to view the article in the Microsoft
Knowledge Base: 276367 OFF2000: How to Obtain the Latest Office
2000 Service Pack IMPORTANT: Before you install Microsoft
Office 2000 Service Pack 3 (SP-3), you must have Microsoft Office
2000 Service Release 1/1a (SR-1/SR-1a) installed first. For additional
information about how to obtain Office 2000 Service Release 1/1a
(SR-1/SR-1a), click the following article number to view the article in
the Microsoft Knowledge Base: 245025 OFF2000: How to Obtain
and Install Microsoft Office 2000 Service Release 1/1a (SR-1/SR-1a)
ACCESS 2000 and SQL Server 2000 Readiness Update ACCESS
2000 and SQL Server 2000 Readiness Update Microsoft has created
the "ACCESS 2000 and SQL Server 2000 Readiness Update" to

correct this issue. Follow the steps below to obtain and install this Oupdate: Make sure you have Office (or ACCESS) 2000 SR-1. You can obtain the Office 2000 SR-1/SR-1a Oupdate the from the following Microsoft Web site:

http://office.microsoft.com/downloads/2000/O2kSR1DDL.aspx Rename the following files by changing the extension from .mde to .old: Acwzlib.mde Acwzmain.mde Acwztool.mde For the English version of Office, by default, these files are located in the C:\Program Files\Microsoft Office\Office\1033 folder. Download the "ACCESS 2000 and SQL Server 2000 Readiness Update" from the following Microsoft web site:

http://office.microsoft.com/downloads/2000/Accsql.aspx Make a note of the folder to which you download this Oupdate. Double-click the Accsql.exe file, which you downloaded in step 2, to install the "ACCESS 2000 and SQL Server 2000 Readiness Update." IMPORTANT: After installing this Oupdate, you must use Mixed Mode Authentication (Windows Authentication and SQL Server Authentication) to upsize your database by using a SQL Server login. Windows Authentication mode is not supported. If Windows Authentication mode is set when you upsize, your tables or queries may be skipped. NOTE: If you install SQL Server with Windows Authentication Mode set, and later change the Security Authentication to Mixed Mode Authentication, the built-in system administrator (SA) logins password may be blank. After enabling SQL Server security you should immediately create a password for the SA login to help prevent unauthorized ACCESS to your SQL

Server. For additional information, click the article number below to view the article in the Microsoft Knowledge Base: 274773 BUG: If You Change Windows Security to Windows/SQL Security the SA Password is Blank 100Test
