Those who want to learn something, whether they are young or old, all can have their classes on different subjects. Some can even get a certificate or diploma after completing the required courses. Therefore, the number of people receiving this kind of education is on the rise. Why is it so popular? The reasons are as follows. For one thing, the quick development of the Internet has provided many people a chance to attend class given by famous schools and teachers. For another, compared with having classes at school, online education saves our time, energy and money, especially to those who are too busy to study full time. The most important reason is that the schedule is flexible so that we can have a free choice to study what we need badly and decide when, where and how to study. As far as I'm concerned, I appreciate this new form of education and also have got some benefits from it. It's indeed a helpful complement to the traditional education means. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
