Which country would you like to visit? Use specific reasons and details to explain your choice. When it comes to the issue of choosing a foreign country for a visit, different people hold different views. Some may say they want to go to China. some may choose to go to Japan. If I were faced with this question, I would probably choose to go to US. In the following discussion, I would like to present a few important reasons to support my viewpoint. The most important reason that I cannot neglect is that US has many amusement parks, such as Disney World, 环球乐园 and so on. I believe there is no one who don ' t know Disney. When I was a child, I always watched many cartoons which produced by Disney Co. Nowadays, not only children but also adults are both familiar with the characters like Micky Mouse, Donald Duck and Snow White. Disney World is an amazing and exciting park which can bring entertainment to you. There you have chance to communicate and play with these cartoon characters. Disney World is an attractive place I look forward to visiting it. Don ' t you have the same thought with me? Another head and chief reason that I have chosen to put there is that I want to see higher-level education in US. Back in my country, my teacher told me a lot about universities and colleges in the US. Professors teach students theories about a certain subject, and then let them have

some hands-on experiences in the lab. I think this is a really great idea, since a lot of people are having trouble to apply theoretical knowledge into practical uses. I would like to visit universities such as MIT and Yale to see how teachers give lectures and how students work in the labs. Don't you think this is very attractive? Last but not the least reason is that there are a lot of grand and splendid scenery in US. I believe that you must know Yellow Stone National Park which is the first national park built in the world. I got a lot of information about this national park from magazines. There are not only many rare animals and plants but also a large amount of special geographical phenomena in this park. All these make me much interested in visiting this park. To sum up, given all the reasons discussed above, we can safely reach the conclusion that going to US for my 2 weeks visit is the best choice. If you can come with me, we can play in Disney World and visit MIT in Boston together. Don't you think this will be a great experience?

110. Some people prefer to spend most of their time alone. Others like to be with friends most of the time. Do you prefer to spend your time alone or with friends? When it comes to the issue whether we should spend most of our time alone or with our friends, different people hold different views. If I were faced with this question, I would probably say I like to spend most of my time with my friends. In the following discussion, I would like to present a few important reasons to support my opinion. The most important reason that we cannot neglect is that you can share your thoughts with your friends. Everyone gets emotional from time to time. When I am happy because of the new

dress I bought, I would like to tell my friends. They will feel excited, too. When I am very upset about my recent grade, I would like to tell them as well. They will comfort me and help me to get a better grade. When my friends get something in their minds, they will call me. We always share thoughts and encourage each other on our way to success. If you can understand this, you can understand my view better. Another head and chief reason that I have chosen to put here is that staying with your friends can help you to know more information. Everyone lives in the community has his/her own way of getting information. But sometimes, that is just not enough. At this moment, your friend will tell you more of what you need to know. Once, my friend knew about a fantastic job opportunity in the field of engineering which is my main interest. She phoned me immediately and told me where to find out more about it. I checked out the website and felt that it was the right job for me. I started applying for it. I have to thank my friend for sharing information with me. Otherwise, I may lose this great opportunity. Don't you think this example is very persuasive? Admittedly, there are advantages for people whom like to spend their time alone. For example, maybe they can use their time more efficiently. Nevertheless, the advantages of spending with friends carry more weight than that of spending time alone. Therefore, the most striking conclusion is obvious. To sum up, given all the reasons discussed above, we can safely reach the conclusion that spending time with friends is better than spending time alone. I would like to make a suggestion to people who like to stay alone most of the time. If you

talk to your friend more and spend more time with them, you will be opening a window for your future. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
