Support your position with reasons and/or examples from your own experience, observations, or reading.从根本上说，科技使人们疏远远甚于使人们聚合在一起。1. 不能交流的可以交流了，不容易交流的变得容易拉2. 增进交流也就加强了理解使得交流有更深层次3. 当然有些工具的产生确实也使得交流变得肤浅但是综合来看不支持作者的观点 I believe there is some truth to the speaker ' s claim that technology separates and alienates people. However, there is certainly at least as much evidence that technology serves best to bring people together. The most obvious way that technology separates and alienates people from one another is symbolized by the computer nerd (nerd: n. 讨厌的人, 卑微的人 an unstylish, unattractive, or socially inept person. especially: one slavishly devoted to intellectual or academic pursuits *computer nerds*) sitting glazed-eyed (adj. 面无表情的, 目光呆滞的) before his computer screen in a basement, attic, bedroom, or office cubicle. While this scene is a caricature, of course, it ' s true that practically everybody who uses email or surfs (transitive senses: to scan the offerings of [as television or the Internet] for something that is interesting or fills a need) the Internet does so alone, with only his or her computer for company (adv. 陪

着)。And, to the extent that computer use increases the amount of time we collectively spend in solitary activities, it increases the amount of time we spend separated from our fellow humans. On the other hand, technology has been a wonderful aid in bringing people together, or, in many cases, back together. Speaking for myself, I can say that I have become connected with quite a number of people via email with whom I might never have spoken otherwise. These include old friends with whom I had fallen out of (fall out of: v. 放弃[习惯等]) the habit of writing regular letters but with whom I now correspond regularly because of the ease with which email can be sent and delivered. A second way in which the new technology has brought people together is by allowing individuals who have common interests to make contact with one another. It is possible to find people who share one's interest in nearly anything, from aardvarks (n. [动]土豚) to zippers. Such contacts may be ephemeral, but they can be a great source of information and amusement as well. I would hazard (VENTURE, RISK *hazard a guess as to the outcome*) a guess that for each person who sits neurotically (neurotic: of, relating to, constituting, or affected with neurosis) at home, eschewing personal contacts with others in favor of an exclusive relationship with his computer, there are hundreds of others who have parleyed their email capacity and their access to the Web into a continuous succession of new acquaintances. In sum, it seems clear to me that technology has done more to bring people together than to isolate them. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
