`sudo apt-get install samba` `sudo apt-get install smbfs` 下面我们来共享群组可读写文件夹，假设你要共享的文件夹为：

`/home/ray/share` 首先创建这个文件夹 `mkdir /home/ray/share`

`chmod 777 /home/ray/share` 备份并编辑smb.conf允许网络用户访问 `sudo cp /etc/samba/smb.conf /etc/samba/smb.conf_backup`

`sudo gedit /etc/samba/smb.conf` 搜寻这一行文字 `. security = user`

用下面这几行取代 `security = user` `username map =`

`/etc/samba/smbusers` 将下列几行新增到文件的最后面，假设允许访问的用户为：newsfan。而文件夹的共享名为 Share [Share]

`comment = Shared Folder with username and password` `path =`

`/home/ray/share` `public = yes` `writable = yes` `valid users = newsfan`

`create mask = 0700` `directory mask = 0700` `force user = nobody` `force`

`group = nogroup` `available = yes` `browseable = yes` 100Test 下载频

道开通，各类考试题目直接下载。详细请访问
