```
create table t as
0select * from all_objects where rownum <= 4
0select
object_name, object_id from (
0select object_name, object_id from t
where object_name like '%%' order by dbms_random.random )
where rownum <= 4
0select object_name, object_id from (
0select
object_name, object_id from t sample ( 1 ) where object_name like
'%%' order by dbms_random.random ) where rownum <= 4
```
