There are probably many more than those that are listed here, but this should give you a good start. In addition to the keywords below, you may want to also add such things as swear words, body parts, slang words for body parts and anything dealing with pornography. Please do be careful as some E-Mail might be legitimate and contain some of these words. Feel free to exclude any keywords you do not want to filter. Keep in mind that spammers sometimes are clever and will misspell words so that they would slip through the spam filters. For more information on filtering your E-Mail, please see the E-Mail Filtering section of our FAQ.
