

httpClient遇到CircularRedirectException的处理 PDF转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/287/2021_2022_httpclient_c104_287858.htm 利用httpClient时；报错信息

```
: org.apache.commons.httpclient.CircularRedirectException:
Circular redirect to ' http://**** ' 将redirect设为false，手动处理
httpClient的重定位： Header locationHeader =
method.getResponseHeader("location").
client.getParams().setParameter("http.socket.timeout", new
Integer(60000 * 10)). Header host =
method.getRequestHeader("host"). method = new
GetMethod("http://" host.getValue() locationHeader.getValue()).
method.setFollowRedirects(false). 处理时最好加上次数限制，防止出现死循环
