Writing As is known to all, computers are becoming more and more popular in our daily life nowadays, especially in education. Write a short essay of about 120 words, describing how important computers are in education.

It has turned out that computers have become quite indispensable to education. With computers, students can do their homework more quickly and more efficiently. with computers, teachers can reduce their work load and improve their teaching. For instance, computers can free teachers from certain kinds of time-consuming bookkeeping. help teachers "bank" test items, thus greatly reducing the time required to produce a new test, and mark test papers. More importantly, they can analyze test results, indicating to the teacher which points may need further treatment in class. They can also make it possible for a teacher in the classroom to give individual attention to students who are having trouble in their studies. While the rest of a class is working on an educational program, the teacher can take the time to work directly with a student who is falling behind. So it goes without saying that computers are extremely important in education at all levels. 100Test
