The United Nations wanted everyone to know that the world is in danger. They hoped that governments would quickly in order to "conserve (保存，保护，果酱)" nature. Here is one example of the problem. At one time there were 1300 different plants, trees and flowers in Holland. But now only 861 remain. The others have been destroyed by modern man and his technology (工业技术，应用科学). We are changing the earth, the air and water, and everything that grows and lives. We cant live without these things either, If we continue like this, we shall destroy ourselves. What will happen in the future? Perhaps it is more important to ask, "What must we do now?" The people who will be living in the world of tomorrow are the young of today. A lot of them know that conservation is necessary. Many are helping to save our world. They plant trees, build bridges across rivers in forests, and so on. In a small town in the United States a large group of girls cleaned the banks of 11 kilometres of their river. Young people may hear conservation through a record called "No Ones Going to Change Our World". It was made by the Beatles, Liff Richard and other singers. The money from it will help to conserve wild animals.
