

VB6如何在托盘中写入应用程序图标 PDF转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/295/2021_2022_VB6_E5_A6_82_E4_BD_95_E5_c97_295967.htm

1、新建立一个VB6工程，将Form1的ShowInTaskBar属性设置为False
2、菜单：工程--添加模块 按“打开”这样就添加了一个新模块，名为Module1，保存为Module1.bas
3、在Module1中写下如下代码：
Option Explicit
Public Const MAX_TOOLTIP As Integer = 64
Public Const NIF_ICON = &H1
Public Const NIF_TIP = &H0
Public Const NIM_DELETE = &H200
Public Const WM_LBUTTONDOWN = &H202
Public Const WM_LBUTTONDBLCLK = &H204
Public Const WM_RBUTTONUP = &H206
Public Const SW_RESTORE = 9
Public Const SW_HIDE = 0
Public nfiIconData As NOTIFYICONDATA
Public Type NOTIFYICONDATA
 cbSize As Long
 hWnd As Long
 uID As Long
 uFlags As Long
 uCallbackMessage As Long
 hIcon As Long
 szTip As String * MAX_TOOLTIP
End Type
Public Declare Function ShowWindow Lib "user32" (ByVal hWnd As Long, ByVal nCmdShow As Long) As Long
Public Declare Function Shell_NotifyIcon Lib "shell32.dll" Alias "Shell_NotifyIconA" (ByVal dwMessage As Long, lpData As NOTIFYICONDATA) As Long
4、在Form1的Load事件中写下如下代码：
Private Sub Form_Load()
 以下把程序放入System Tray
 =====System Tray Begin
 With nfiIconData
 .hWnd = Me.hWnd
 .uID = Me.Icon
 .uFlags = NIF_ICON Or NIF_MESSAGE Or NIF_TIP
