Hmmm. I think thats it for now. Im sure Ill think of more questions later. You basically want to have as much freedom as you can. That means: few classes, a degree path that has few requirements, unlimited funding independent of having to teach, sufficient summer and travel funding, and the ability to switch advisors if necessary. You want to be able to concentrate on your research without having to worry about a frustrating advisor, money issues, or classes. (Classes dont really teach you anything at the graduate level.) These things will end up being more important than the reputation of the advisor or the school. have any complaints, how many women there are in the department, whether female students are treated equal to male students, whether they have sufficient funds, whether there are any dark secrets about the

department, ... 100Test 下载频道开通，各类考试题目直接下载。
