Part Writing 范文一 Nowadays, there usually exists a wide
0selection of electives for college students to choose from. However,
students have quite different plans for their future so they always end
up learning courses based on their own ideas. Some students may
choose to learn a certain course in order to obtain an extra certificate
for their job hunting after graduation. Because they assume that some
more knowledge could ensure more chances of winning in finding a
good job. Others may have their choice made just for fun. They tend
to hold the idea that college life could be more colorful if they could
widen their knowledge through elective courses. As far as I ' m
concerned, I ' m inclined to choose electives based on both the
value of the courses and the interest of my own. 范文二 Nowadays
many college students prefer to have electives in their spare time
because the courses can offer a variety of skills and abundant
knowledge apart from what they learn in the daily courses. There are
many factors that may account for it, and the following are the most
conspicuous aspects. To start with, many students want to get
another degree besides their own, so that they can have more
competence when they seek a job. Furthermore, as for me, I don ' t
care about degree or job, I just want to obtain some necessary skills
to make my college life worthwhile. What I ' m concerned most is
how to own more skills that may be necessary for my future. Finally,

some students want to learn anything that is different from what they are learning now. The science students, for example, want to know about Shakespeare while the art students want to tell how a vehicle works and how to deal with it when it breaks down. So, they can all get what they think is useful to their college life. On the whole, the phenomenon is one of the results of multi-demand of the employment market. There is still a long way for us to improve the elective itself, but as a student myself, I find it rewarding and interesting.

Part Fast Reading 1.D) a powerful force for global integration 2.C) at an annual rate of 3.9% 3.B) 20% 4.D) They give them chances for international study or internship. 5.A) Yale ' s collaboration with Fudan University on genetic research 6.C) It was intentionally created by Stanford University. 7.B) It has been unsteady for years. 8.changes in the visa process 9.take their knowledge and skills back home 10.strengthen the nation
