https://www.100test.com/kao_ti2020/449/2021_2022__E8_8B_B1_E8_AF_AD_E4_B8_93_E4_c94_449210.htm People elsewhere agree on what a mountain is or do ___1___ they? The fact is that definitions vary. Everyone admits for example, that Everest is a mountain, the lowest of ___2___ them all, an altitude of almost 30,000 feet. But what about ___3___ Snowdon, the loftiest peak in Wales? It raises a mere 3000 ___4___ feet, yet it is also called a mountain. Comparison a little matter of relativity is the key. To the average person living on North America's Great Plains, Vermont's Green Mountains look lofty indeed, but to anyone from the Rocky Mountains, the Green Mountains seem something more ___5___ than hills. Geographers generally agree that, to be a mountain topographically, a landmass might reach an altitude of 3000 ___6___ feet above the level of the sea. Mount Everest, for instance, is 30,000 feet above sea level, but not only 15,000 feet above the ___7___ neighboring Tibetan plateau. Geologists restrict the definition even more, maintaining that a mountain is a mountain with ___8___ virtue of its geological structure. Some rugged highlands are not really mountains, when some flat, low-lying rock surfaces ___9___ are true mountains. They are low now because of centuries of erosion. There are even mountains under the sea the Mid-Atlantic Ridge, for example. Like all true mountains, they are originally formed by large-scale movements of the ___10___ earth's crust.

答案：1. elsewhere everywhere elsewhere 意为“别处” 2. lowest highest 3. an 前加 with with 在此处表示“具有……”相当

于having4. raiserisesraise为及物动词，其后常带宾语；rise为不及物动词a mere 3000 feet在此处不是raise的宾语，而是状语5. somethingnothingnothing此处为副词，修饰more。本句意义为“对生活在北美大平原地区的一般人而言，谓Vermont州的Green Mountains看上去真的很高了，但对于任何一个来自Rocky Mountain地区的人而言，Green Mountain看上去不过是个山丘而已”。6. mightmust作为一种标准必须达到某个高度7. 删除only之前的not否则文理不通8. within或由byby/in virtue of：与“by reason of，because of”同意9. whenwhile此处while与whereas同意，表示对照比较10. arewereoriginally formed 该动作是很早以前完成或结束的 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
