

修改工作组用户密码 PDF转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/449/2021_2022__E4_BF_AE_E6_94_B9_E5_B7_A5_E4_c97_449118.htm 下面是修改工作组用户密码的函数，调用时如果用于密码为空，请使用""，不要使用null，两者不同。：) Function

```
CheckUserPasswordInGroup(Username As String, _ oldPassword
As String, newPassword As String) As Boolean On Error GoTo
ChkErr Dim wk As DAO.Workspace, Ur As DAO.User, i As
Integer, Found As Boolean CheckUserPasswordInGroup = False
Found = False Set wk = DBEngine.CreateWorkspace("", "Admin",
"") @#//要特别注意上面一句，必须使用拥有数据库管理权限
的用户名和密码打开工作区！ @#//下面一段是查找用户名是
否存在，如果存在，修改密码，不存在出错报告。 For i = 0
To wk.Users.Count - 1 If wk.Users(i).Name = Username Then Set
Ur = wk.Users(i) Found = True Ur.newPassword oldPassword,
newPassword Exit For End If Next i If Not Found Then MsgBox
"@#" amp. "@# 不是一个有效的用户名！", _ vbExclamation, "艾
赛思应用网" CheckUserPasswordInGroup = False Exit Function
End If CheckUserPasswordInGroup = True Exit Function ChkErr:
MsgBox "@#" amp. "@# 用户密码修改失败！", _ vbExclamation, "
艾赛思应用网" CheckUserPasswordInGroup = False End Function
