Part I Listening Comprehension 略 Part II Vocabulary 16. Some teenagers harbor a generalized resentment against society, which _____ them the rights and privileges of adults, although physically they are mature. A. rejects B. denies C. deprives D. restricts 17. There's little chance that mankind would _____ a nuclear war. A. retain B. endure C. maintain D. survive 18. His long service with the company was _____ with a present. A. admitted B. acknowledged C. attributed D. accepted 19. The story that follows _____ two famous characters of the Rocky Mountain gold rush days. A. relates B. states C. concerns D. proclaims 20. China started its nuclear power industry only in recent years, and should _____ no time in catching up. A. lag B. lose C. delay D. lessen 21. His parents began to _____ a small sum of money every month for his college education when he was still a little child. A. put up B. lay down C. set aside D. place apart 22. You really ought to _____. all these late nights are doing you no good. A. bring down B. slow down C. pull through D. pass through 23. When he noticed that no one was interested, Ned _____ talking about the film. A. left off B. worked on C. set down D. sized up 24. The reason he has been such a success is _____ he never gives up. A. as B. that: C. since D. because 25. A man escaped from prison last night. It was a long time _____ the guards discovered what had happened.

A. until B. before C. since D. when 26. No other work is more important right now _____ prevent the spread of this disease. A. as to B. than to C. as D. than 27. A man cannot be really happy if _____ he enjoys doing is ignored by society as of no value. A. what B. when C. that D. all what 28. The recipe said to use butter, but as we'd run out we had to _____ with milk. A. do away B. make do C. make up D. make up to it 29. Its importance has been _____ me very strongly. A. brought into action B. brought home to C. brought to mind D. brought to light 30. Mex, a student of Chinese literature from Australia, is very _____ Beijing opera. A. fond in B. fond for C. keen for D. keen on 31. Age had (withered) the pretty lady's face A. destroyed B. hurt C. made decrepit D. necked 32. Their request was (absurd) and consequently rejected. A. ridiculous B. excessive . C. feasible D. Harsh 33. He was given imprisonment without the (option of) a fine. A. punishment B. request C. freedom to choose D. Demand 34. It usually takes some time to (get over) the shock of sb's death A. overcome B. do without C. ignore D. deal with 35. They (accorded) due praise to him for exceeding his fellow workers in production . A. matched B. sublimed C. awarded D. revealed

Part III Reading Comprehension Passage 1 In 1967, in response to widespread public concern aroused by medical reports of asbestos-related deaths, the National Medical Research Council organised a committee of enquiry to investigate the health threats associated with the use of asbestos in the building industry. After examining evidences provided by medical researchers and building workers and management, the Council published a report which

included advice for dealing with asbestos. The report confirmed the findings of similar research in the United States and Canada. Exposure to relatively small quantities of asbestos fibres, they concluded, was directly responsible for the development of cancers, asbestosis and related diseases. Taking into account evidence provided by economists and building industry management, however, the report assumed that despite the availability of other materials, asbestos would continue to play a major role in the British building industry for many years to come because of its availability and low cost. As a result, the council gave a series of recommendations which were intended to reduce the risks to those who might be exposed to as best as in working environments. They recommended that, where possible, asbestos-free materials should be employed. In cases where asbestos was employed, it was recommended that it should be used in such a way that loose fibres were less likely to enter the air. The report recommended that special care should be taken during work in environments which contain asbestos. Workers should wear protective equipment and take special care to remove dust from the environment and clothing with the use of vacuum cleaners. The report identified five factors which determine the level of risk involved. The state and type of asbestos is critical to determining the risk factors. In addition, dust formation was found to be limited where the asbestos was used when wet rather than dry. The choice of tools was also found to affect the quantities of asbestos particles that enter the air. Machine tools produce greater quantities of dust than hand tools and, where possible, the use of the

latter was recommended. A critical factor which takes place in risk reduction is the adequate ventilation of the working environment. When work takes place in an enclosed space, more asbestos particles circulate and it was therefore recommended that natural or machine ventilation should be used. By closely following these advice, it was claimed that exposure can be reduced to a reasonably practical minimum . 36. Exposure to asbestos fibres can cause cancer _____. A. only when asbestos is used in building industry. B. only when it is used in large quantities. C. even if it is used in small quantities. D. if they are used when wet rather than dry. 37. Exposure to asbestos fibres is harmful to peoples health A. so the use of asbestos is limited. B. but asbestos will continue to be used for a long time to come. C. so other new kinds of materials are under development. D. but the) will not be so when ventilation devices are used 38. It can be inferred from the passage that the real danger comes from _____. A. the 3sbestos dust that people take in B. the contact of the workers skin with asbestos particles C. the inferior quality of the asbestos itself D. the excessive use of man-made asbestos material 39. Evidence from the economists and the building industries shows that _____. A. exposure to asbestos fibres is cancer causing B. asbestos is in extensive use in building industry C. use of asbestos is being reduced gradually D. exposure to asbestos fibres can be reduced significantly 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
