The biological clock tells _____1_____ when to form flowers and when the flowers should open. It tells _____2_____ when to leave the protective cocoon 茧 and fly away, and it tells animals and human beings when to eat, sleep and wake. Events outside the plant and animal _____3_____ the actions of some biological clocks. Scientists recently found, for example, that a tiny animal changes the color of its fur _____4_____ the number of hours of daylight. In the short _____5_____ of winter, its fur becomes white. The fur becomes gray brown in color in the longer hours of daylight summer. Inner signals control other biological clocks. German scientists found that some kind of internal clock seems to order birds to begin their long migration _____6_____ twice each year. Birds _____7_____ flying become restless when it is time for the trip, _____8_____ they become calm again when the time of the flight has ended. Scientists say they are beginning to learn which _____9_____ of the brain contain biological clocks. An American researcher, Martin Moorhead, said a small group of cells near the front of the brain _____10_____ to control the timing of some of our actions. These _____11_____ tell a person when to _____12_____, when to sleep and when to seek food. Scientists say there probably are other biological clock cells that control other body activities. Dr. Moorhead is studying

_____13_____ our biological clocks affect the way we do our work2. For example, most of us have great difficulty if we must often change to different work hours. _____14_____ can take3 many days for a human body to accept the major change in work hours. Dr. Moorhead said industrial officials should have a better understanding of biological clocks and how they affect workers. He said _____15_____ understanding could cut sickness and accidents at work and would help increase a factory ' s production. 1. A) scientists B) humans C) plants D) animals2. A) insects B) birds C) fish D) snakes3. A) effect , 达到 B) affect 影响 C) effected D) affected4. A) because B) for the reason that C) because of D) since5. A) months B) days C) minutes D) weeks6. A) flight B) fly C) movement D) transportation7. A) prevented from阻止, 妨碍 B) ordered by C) helped by D) intruded on8. A) and B) but C) therefore D) however9. A) portions B) parts C) sections D) kinds10. A) try B) tries C) seem D) seems11. A) things B) parts C) cells D) actions12. A) awaken B) wake C) awakening D) wake-up13. A) how B) why C) where D) what14. A) We B) It C) They D) You15. A) so B) with C) such D) if 100Test 下载频道开通 , 各类考试题目直接下载。 详细请访问 www.100test.com
