范文: The table compares the opinions of male and female club members about the services provided by a city sports club. We can see from the responses that the male members are generally happy or satisfied with the range of activities at the club, with only 5% dissatisfied. In contrast, however, only about two-thirds of female members were positive about the activity range and almost a third were dissatisfied. The genders were more in agreement about the club facilities. Only 14% of women and 10% of men were unhappy with these, and the majority (64 and 63% respectively) were very positive. Finally, the female respondents were much happier with the club opening hours than their male

counterparts. Almost three-quarters of them were very satisfied with these and only 3% were unhappy, whereas nearly 40% of the men expressed their dissatisfaction. Overall, the table indicates that female members are most unhappy with the range of activities, while male members feel that opening hours are the least satisfactory aspect of the club. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
