Computers and mobile phones have virtually flooded every trade and every corner, not exaggeratedly speaking. Ironically, they have not yet eroded the importance of the traditional writing skills, perhaps because handwriting is more than a communication means. Besides functional roles, it, perhaps, bears aesthetic significance. Take traditional Chinese calligraphy as a specific case in point. It has been practiced as fine arts. As a result, handwriting and the skills in writing have never faded in importance, nor have they shrunk in the scope of utility. Another reason why people still cherish the traditional skills in writing is, as largely accepted, that these skills have been already woven in the warp and weft of the culture, making these skills perpetuate rather than an ephemeral phenomenon. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
