I. 写作预测：1. It is generally believed that education is of vital importance to the development of individuals and the well-being of societies. What should education consist of to fulfill both these functions? 2. The school leavers go to travel or work for a one-year

period instead of going directly to the university. What do you think of the advantages and disadvantages for their studies? 3. Some people think that school students should be selected according to academic ability, but other people believe that students with different abilities should be educated together. Discuss different views and state your reasons and your opinion 4. Individuals can do nothing to improve environment. Only governments and big companies can make difference. To what extent do you agree or disagree? 5. In many countries, good schools and medical facilities are available only in cities. Some people think new teachers and doctors should work in rural areas for a few years. But some others think everyone should be free to choose where they work .Discuss and give your own opinion. 6. What is a very important skill a person should learn in order to be successful in the world today? Choose one skill and use specific reasons and examples to support your choice. 7. The international trade has made many goods transport to other countries, such as daily necessities. Such goods are usually transported at a long distance. What do you think if its benefits overweigh the drawbacks? 8. So little has been done to protect the animals and plants, although people have been aware of this problem for a long time. State the reason and how to solve it. 9. Many people believe that scientific research should be carried out and controlled by the governments rather than private companies. To what extent do you agree or disagree with this opinion? 10. University should teach students knowledge and skills helping for the future career. To what extent do you agree or disagree?
