A Place of Our Own
We are all usually very careful when we buy something for the house. Why? Because we have to live with it for a long time. We paint a room to make it brighter, so we choose the colors carefully. We buy new curtains in order to match the newly decorated room, so they must be the right color. We move the furniture round so as to make more space or we buy new furniture and so on. It is an endless business. Rich or poor, we take time to furnish a room. Perhaps some people buy furniture in order to impress their friends. But most of us just want to enjoy our surroundings. We want to live as comfortably as we can afford to. We spend a large part of our lives at home. We want to make a small corner in the world which we can recognize as our own. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
