And everything needs continual improvement if the ever changing and increasing demands of humankind are to be met. If I am ever given the chance to change one important thing about my home town, it would be internet service. Needless to say that nothing generally revolutionized the way we live as internet in the past decade. Thus, an improvement in this vital service would mean an even more, unheard betterment to the people in my home town. It is said that information is power. True saying indeed! I can envision how everything in my home town could improve dramatically if the internet service in it were made free, fast and staying out there like electricity, telephone or water all the time. One thing, a fast free and reliable internet service could improve in my home town is the way people work. If there is a this said service people in my home town must not necessarily commute to a far place to do their job. This in turn would mean less traffic jams, spacious work place, more time for family and recreation and so on. The way people learn would be another important thing that a fast, free and reliable internet service could better in my home town. People will have the chance to go through tremendous and different information resources in a very small amount of time. They, apparently will also take less time to share it. This assures a more fulfilled life for my home town people. Since its advent, internet

touched every part of our life. It in a dazzling way improved the way we do business, learn and communicate. A change in internet service implies good way of living for every one in my home town.(Essay ID: 331 . Sample essay provided by Erin Billy of www.TestMagic.com)
