Correction (15 minutes) A good way to get information for essays and reports is to interview people who are experts in --71. your topic or whose opinions may be interesting. Interviews are also a good way to get a sampling of peoples opinions on various questions. Here are some suggestions that will help you make most of a --72. planned interview: 1. If the person to be interviewed (the interviewee) is busy, cancel an appointment in --73. advance. 2. Prepare your questions before the interview so that you make best use of your time. In preparing think about the topic about what the interviewer is --74. likely to know. 3. Use your questions, but dont insist in sticking to --75. them or proceeding in the order you have listed. Often the interviewee will have important information that was never occurred to you, or one --76. question may suggest another very useful one. 4. If you dont understand something the interviewee has said, say politely and ask him or --77. her to clarify it or to give an example. 5. Take notes, if the interviewee goes too slowly --78. for you, ask him or her to stop for a moment, especially if the point is important. A tape recorder lets you avoid this problem. Therefore, --79. be sure the interviewee agrees to be taped. 6. As soon as possible after the interview, read over your notes. They may need clarified while the --80. topic is still fresh in your mind. 答案：71. in -- on 72. the (most) 73. cancel -- make 74. interviewer -- interviewee 75. in -- on

76. 去掉was 77. (say) so 78. slowly -- fast 79. Therefore -- However
80. clarified -- clarifying 第八篇：Error Correction (15
minutes)Some people, in all seriousness, say that humans will be
living in space within the next hundred or so years. Planet Earth will
be crowded, dirty and lack of resources. A sort of exodus --71.of
mankind will begin. Spaceships will be assembled so that they revolve
around the earth. Some may orbit around Mars. These space stations
will be serviced by space buses. We saw the first space bus launch in
--72.April 1981. This was "Columbia", it made several --73.orbits
around the earth and then returned, landing on a huge dry lake bed
in California. "Columbia" will be used again. Previous spaceships
have been abandoned, only the nose cone being used to bring the
crews back to earth. --74.Upon established, each space station will
--75.generate its own atmosphere and have its own agriculture. It will
need to rotation to provide --76.an artificial gravity. people will be
forced inwards --77.from the center by centrifugal force. The moon
and Mars could become new sources of new materials. Driving
through space will no --78.longer need Earth fuel- the energy would
come from the sun. This energy would be converted from
--79.electricity to work magnetic rockets. That all sounds quite
fantastically but, with --80.the rapid development of modern
technology, who knows about what the future holds? 答案：71.
lack--short 72. launch--launched 73. it--which 74. crews--crew 75.
upon--once 76. rotation--rotate 77. inwards-outwards 78.
will--would 79. from--into 80. fantastically--fantastic 100Test 下载
