, whole number 1.因子：factor or divisor If  $x$  and  $y$  are integers and  $x \neq 0$ ,  $x$  is a divisor (factor) of  $y$  provided that  $y = xn$  for some integer  $n$ . In this case  $y$  is also said to be divisible by  $x$  or to be a multiple of  $x$ . For example, 7 is a divisor or factor of 28 since

$28 = 7 \times 4$ , 则因子个数为  $(4 + 1)(1 + 1) = 10$  100Test 下载频道开通，各类考试题目直接下载。详细请访问 [www.100test.com](http://www.100test.com)
