Old Man Myths and Realities
1 When does a middle-aged man become an old man? Officially, of course . it is when we reach retirement age . But , as we all know, this is a fairly blunt (生硬的) method of decision making . As life expectancy (预期寿命) increases , retirement planning needs to be changed . This is because being an old man today is very different from what it was a generation or so ago . 2 Sixtyfive is the new middle-aged man . These days people are talking about the youngold , that is ages 70-75 . and those over 75 as the old-old . The young-old frequently continue in good health and maintain strong links with friends and family, The old-old have a much higher chance of poor health and social isolation . 3 Although men are living longer, there are still more old women than old men . This fact alone should arouse interest as to why . Relatively little is actually known about why this is the case or about the experiences of the old man . Sure, we are aware that the old man experiences anxiety , financial problems , loneliness , etc . but that is really about all we know . 4 It is usually believed that the old man often

complains about their health . In fact , most old man think their health is good even though most are diagnosed with at least one chronic illness . The physical health of the old man is strongly affected by their health behavior when they were younger . 23 Paragraph 1_____ 24 Paragraph 2_____ 25 Paragraph 3_____ 26 Paragraph 4_____ A New Definitions of the Old Man B Changing Concept of the Old Man C Health of the old Man D Happy Old Man And Sad Old Man E Limited Knowledge of the Old Malls Experiences F Contempt for the Old Man 27 Nowadays men generally live longer than_____ 28 A man in his mid-60s is now regarded as_____ 29 More research should be done on the experiences of_____ 30 Most old men consider themselves to be_____ A in good health B in the past C in the wrong D the old man E a middle-aged man F a young man
