Such questions as these are often asked , especially 53 those whose tax money is paying for space explorations . The answers to these questions are many and 54 . Up to now , the practical benefits resulting 55 space research have included the development of new methods and skills , new processes , new services , new products , and even new companies created to make use of what 56 through space travel . Also among the benefits 57 better education (especially in scientific subjects) , 58 management , higher quality of industrial products , and rapid 59 growth . People all over the world are now served by 60 weather predictions , better communication systems , and better understanding of the earth and its environment . Everyone will benefit 61 observations from space make 62 possible to measure the earth ' s resources and 63 whether or not they are being used properly . 64 the space program will help our world deal with the problems of the environment . It has already brought a new appreciation of the complex system 65 man is only a part . In addition to improving the quality of existing products , the space

program has been responsible for the development and improvement of new ones . The most important is the computer . To bring the endangered Apollo 13 astronauts home safely in 1970 , a new flight plan had to be made taking account of an unbelievably complex combination of elements . The computer accomplished this task in seventy-two minutes , whereas a man or a woman working with pencil and paper take more than a million years! If there had been no space program , it is doubtful that computers would now be so widely used in industry and government . 51 . A . Consider B . Considering C . Considered D . Having considered52 . A . totals B . money C . sums D . dollars53 . A . to B . for C . by D . /54 . A . various B . variable C . varied D . variant55 . A . from B . in C . out of D . by56 .
