My choreographer keeps chiseling away at me, hoping to shape me into perfection. But she can't expect chunks to just fall off. I know the rules of chivalry forbid it, but sometimes I feel like choking that chubby woman. When I hold that thought, I have to chuckle. It certainly wouldn't be the Christian thing to do. Today, choreography is an essential component of many performing arts. Unless you're just part of a chorus, there's probably some dancing involved in your performance. A brief choreographic presentation can add beauty and excitement to any show. I've tried to make it as a dancer but it's hard to do when you have chronic injuries. These injuries can

easily turn smooth movements into choppy actions. I ' ve been chopped by my share of bad review. However, it ' s not completely my fault. If you put my injury and work history into chronological order, you ' ll see that most of major injuries occurred while I was dancing hurt. In other words, the chronology shows that dancing while you have a minor injury could be a very foolish mistake. Yet, many choreographers will insist that you dance with your injury. I prefer to dance for my own pleasure by using nothing but the fingers of your dominant hand. What I would really like to do is to choreograph other people. It would be an exciting career. But I shouldn ' t think too far into the future. For the moment, I need to rest. Perhaps after a few ciders, I ' ll be able to think again. 100Test 下载频道开通 , 各类考试题目直接下载。 详细请访问 www.100test.com
