Julia: Uhh, you can start with the explanation of some terms like "a bull " and "a bear ". Mike: OK. A bull is a situation in which share prices are rising. Julia: What about a bear, then? Mike: A bear is a situation in which share prices keep falling. Julia: Oh, I see. But why the prices get rising or falling? Mike: If there are more buyers, the price will rise. Otherwise, the price will be lower and lower. Julia: How can we make money in the stock market? Mike: If you believe the market will go up, you can buy in or hang on. If it turns out to be true, you can make your profit. Julia: I heard that some people can earn money out of a bear market. How do they win in such a situation? Mike: If you believe the market will fall down, you can sell out your shares and then buy back at a lower price. The price difference is your profit. Julia: It sounds easy to make money from stock investment. Mike: Not at all. When you really invest in stock market, youll get involved into the whole world. Julia: What do you mean by that? Mike: To decide which share youll buy in is quite hard sometimes. You have to consider the market tendency. the growth of the company and youd better know something about technical analysis. Julia: So boring it is. Id better invest in some fixed interest fields. Mike: Certainly you can. You wont suffer from the risks. But your wallet will suffer. Julia: What should I do? Mike: If you really

want to invest in stock, perhaps you should find a broker. 100Test 下载频道开通，各类考试题目直接下载。详细请访问
