Today we will visit scenic spots is the Huangguoshu Falls.

Huangguoshu Waterfall is the first in the Fall, as well as in the world wide to the Great Falls one. In November 1982, the People ' s Republic of China State Council approved, Huangguoshu Falls has been listed as a national key scenic spots. Huangguoshu waterfall from the provincial capital of Guiyang City, 137 km, Guizhou Province is located in the western Zhenning Guanling County and the contiguous counties Dabang Baishuihe River on the River tributaries on. Guiyang from traveling to Huangguoshu, about a half-hour or so. Huangguoshu Waterfall have to, you see, this is already the world famous China ' s largest waterfall. Huangguoshu Falls 68 meters high, with waterfalls, waterfalls, six meters high total of 74 meters, 81 meters wide, Floodwaters in the summer, If the Yellow River Falls reversing dumping, cliffs shook, the bottom Honglei, ten passage can also hear its roar. Due to the strong impact of water flow, damage the spray can diffuse more than a few hundred meters, so that the waterfall is located on the top of the left Tsaitu and markets often damage the mist shrouded. Visitors that the "silver rain throwing Street." Small winter and spring water, waterfalls into it from March 5 lock-down pegged to the roof, far from view, a curtain of white floated down, triumphantly Sasa, If the middle of silk, if cents differentiates the breeze held, such as ladies Wun Sha For

hundreds of years, the majestic appearance Huangguoshu waterfall has been for many writers and scholars have marveled. Guizhou Qing Dynasty famous calligrapher, "Summer Palace" is a misnomer that the amount of those Yan Yin-in "cottage look," wrote the couplet : "White as cotton, and not bow spent shells from casual. Hongxia decorated, Mr need woven days Generation " more vivid image summed up the Huangguoshu Waterfall magnificent scenery. Now, we come to a waterfall fell Department --- rhino Tam. This takes into account the legend of gods and Tam rhinoceros named hidden underwater. Rhinoceros are no gods, no one has ever seen, but the mysterious and remote lake, there is still, no one stood Here, the chapter will train together. If sunny 10:00 or 16:00 or so, as the sunlight refraction, You can also blow through the waterfall being spun off by the rain and fog, to see which rises from the pit of seven-color rainbow, so that you Fireweed majestic appearance of Earth, Li Zhao Yan days flu. Why has this waterfall named Huangguoshu waterfall, and not what other other waterfall? According to folklore, is a tree in the edge of a waterfall tall Ficus virens, according to the local accent, "Electric" and "fruit" pronunciation, and I used to call on people to Huangguoshu, which is a statement. There is also the view that a long time ago legend waterfall nearby farmers like yellow fruit species, the edge of a waterfall has a large yellow orchards, so they made the Huangguoshu waterfall as a waterfall. And the rest of the world famous Great Falls, the Huangguoshu Falls Although no African Victoria Falls, Niagara Falls, North America, Venezuela Angel Falls is so wide, and highly

ambitious, but Huangguoshu Falls has its peculiar, it is the world ' s most karst areas at the Falls, is the most spectacular waterfall. The Falls is like a strange magnetic stones, in its ground and underground water, Water also adsorption eyes with a series of voice in the landscape. One of the most magical one is hidden in a waterfall gully holes in the cliff Gallery, as Wisteria cling hole, water pegged Fly, known as "Seorak." This is the world ' s other great waterfall not a peculiar landscape. Ladies and gentlemen, "Seorak" has come and the Seorak length of 134 meters, which consists of six holes window 3 units hole vents and six channel formed. According to Chinese legend arranged large television drama "Journey to the West" Seorak a drama, is here filming. This is the first window hole, it ' s the lowest position, the pool from the rhino-only 40 meters, but the hole is the most generous windows, 10 meters wide, In the first place, the middle two waterfalls, a river even when 2% of the Water Curtain Falls, the hole will seal all windows. Water was fourth hour began, from a few meters to 10 meters range, Min, as can be arbitrarily CDCC the curtains. This is the second hole window, it is from the window of the first hole only about 4 meters. This is a quiet world, known as the Crystal Palace. It is the heart of Seorak, is 11 meters long, nine meters high and three meters wide. A roadside springs, the clear, bright and clean water in a year round water level. Top of many hanging stalactite, the straw stalactite-like there are precious stone curl. Also on the wall hung countless Shiman, stone screens. This is the third hole window, it highlights the field, much like a balcony. This window is a hole-meter, 3-meter-long, the outside perimeter

guard, visitors can stand behind the guardrail hand touch Falls, People here so called "touch waterfall Taiwan." Ladies and gentlemen, we now visit the landscape is rhino Tam Valley landscape. Look, from the waist down rhino is a one contiguous or water, followed by rhino Lake, the three Beach, Horseshoe Beach, Fish oil wells, and so on. In this series in the lake, of course, is headed by Tan rhinoceros, it was 17.7 meters deep, often splash beads coverage, in the fog Chu drowned. As long as the sun, a waterfall splashes beads often hung colorful rainbow, with people moving and unpredictable. Huangguoshu Waterfall Why so? This is because the Huangguoshu Waterfall located in the Karst region, the flow is caused by erosion. Traceability erosion crack when they arrived at upper reaches of the river erosion along the karst fracture, corrosion, erosion, abrasion, and gradually expand the pipeline, formation of holes and not charged underground river. Form into local river water after the water sink in Liuzitian ratio gradually increased, created the unique karst region capture, in-flow into water sink in Liuzitian, on the formation of water sink in Liuzitian-waterfall. With water erosion and collapse strategy has steadily increased, more and more underground river cave, So along the surface wadis clustered development of the shaft and skylights, which have continued to expand, merging, Collapse, causing the present magnificent Huangguoshu Falls and Falls downstream deeply dangerous gorge. I hope you raise your camera and shoot Huangguoshu Waterfall, stay in your memory, publicity to more people, because China is the Huangguoshu Waterfall and also belongs to the world."#F8F8F8"
