Olympic Games, Li Xiaopeng and his teammates were outstanding, winning gold in the prestigious mens team event, a first for Chinas gymnasts. Li Xiaopeng also won an individual gold medal in the parallel bars. However, due to a severe foot injury, Lis performance in 2004 Athens Olympic Games was unsatisfying. China finished 5th in the mens team final and Li only got a bronze in parallel bars after he had been unbeaten since 2000 in major competitions. Li Xiaopeng was tortured by a long-time ankle injury and eventually had an operation in 2005. In 2008, after suffering through yet another injury, this time in his toe, he came back to compete in the Chinese Nationals and took gold in parallel bars in two World Cups, thus surpassing Li Ning in the number of world titles. If Chinese men gymnastics can regain mens team event? If Li Xiaopeng will win his second personal Olympic gold medals? I hope so!百考试题编辑整理 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
