should be responsible for teaching students how to judge right and wrong and how to behave well, some say that teachers should only teach students about academic subjects. Discuss both views and give your opinion.

原文：As a result of the responsibility of a teacher, One side argument is they ought to teach the students how to distinguish right and wrong and how to be a human being well. the other side view is they should solely teach students about academic knowledges. In the following paragraphs I will discuss each argument. First, teaching knowledges is a initial responsibility of a teacher. they should make every student learned various knowledges and the methods of how to study. When the students are studying in the primary school, they do not know anything about different subject. A good teacher should have the ability of how to guide the students to study and improve the attention of students increasingly paying to the various subject. On the other hand, apart from academic knowledges the students also need other skills. It is necessary that the teacher taught the students how to realise everything of the society, such as teammork, uderstanding each other, helping someone when he or she needs, in addition, the

teacher also need teach the students how to solve the problems they meet, and how to face the difficult time and so forth. In conclusion, Teacher plays a significant role in Education of students. The academic knowledges and social skills were learned through the teachers. Thus, They should not only teach various knowledges, but teach every social technologies as well.

3.写完整篇文章之后：务必检查：单复数、拼写等 修改版：As to the responsibility of teachers, one argument is that they should solely teach students about academic subjects. While, the other view is that they ought to teach the students how to distinguish right from wrong, and how to be a human being well. In the following paragraphs, I will discuss the above opinions and state my personal view. (点评：所出现错误均为简单语法和拼写错误,还有句子衔接出现问题. 观点的顺序需要与下文顺序一致) People who hold the first view argue that teaching about academic subjects is an essential responsibility for any teacher. From their point of view, a qualified teacher should not only make every student acquire the knowledge, but also learn how to learn independently. Take students in the primary school as an example, most pupils do not know anything about their subjects. Therefore, a good teacher should have the ability to guide the

students to study and inspire their interests on this field. Only in this way can students become independent in their future and further study. 问题：首句为主题句，应言简意赅。之后应该就此深入展开。学习知识：acquire/gain knowledge 注意举例恰当：例子要支持自己的观点，是观点的展开 On the other hand, others hold the opinion that apart from academic subjects, teachers need to teach students about how to tell right from wrong, and how to behave well. They believe that by doing so, students can easily adapt to the society where they may be confronted with various choices, including both the good and the bad. In class time, a teacher's proper behaviors, attitudes and comments on social issues will absolutely set good examples for students. Accordingly, students can develop their correct philosophy of life, and meantime they build up the indispensable quality, such as teamwork, tolerance, perseverance. In this way, the students can learn how to solve the problems they meet, and how to face the difficult time and so forth. 3段：采用总分总结构阐述第二个观点：注意观点的安排上，赞成的观点一般放在后面且论述稍长。 Taking into account the above analysis, I prefer the second view. What makes me convinced is that the ultimate goal of education is to server the development of the society. From my point of view, only those people, who are quipped with not only knowledge, but proper behavior and the ability to tell right from wrong, can shoulder the responsibility of constructing society. 文章尾段完成任务：总结上文，表明自己观点，简要说明原因。 100Test 下载频道开通，各类考试题目直接下载。详细请访问 [www.100test.com](http://www.100test.com)
