The Ocean Nova, a Bahamas flagged cruiser with 104 people aboard which conducted a tour of Antarctica, is seen stranded near an Argentine base in Antarctica February 17, 2009. A Bahamas-flagged cruise ship, Ocean Nova, with 74 passengers and 30 crew, was stranded near an Argentine base in Antarctica on Tuesday, the Argentine Army said. The vessel became stranded near the base of San Martin, 550 nautical miles (about 1,000km) south of the Chilean base of Frei, when approaching the Mac Clary glacial. No casualties have been reported. The vessel is safe and there is no risk to the passengers and crew, the Argentine Army said. The Argentine and Chilean armies are assisting in rescue operations, military sources said. A Spanish vessel of Oceanographic Investigation (BIO) Hesperides and another from Clipper Adventure Transport are also at the scene to assist in rescue operations. www.100test.com The cause of the accident is yet to be determined. The 240 feet (73 meters) Ocean Nova was built in Denmark. It was carrying passengers from 22 different countries who were on their eighth day of a two-week expedition to explore the polar circle. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
