Tools that make it easy for developers to work with relational data in Java, including Oracle Database tools and an ORM Workbench for the Java Persistence API (JPA). With the ORM Workbench, developers can easily generate and edit JPA entities, annotate existing classes, work with relationships and map datatypes. The ORM Workbench also supports EclipseLink, in addition to other JPA providers. Spring IDE Project and Spring code generation wizards, allow developers to easily work with Spring Beans and generate Spring DAO from existing JPA entities. Editors and Wizards for common WebLogic Server descriptors, help to decrease the amount

of time developers spend looking up documentation and making configuration changes. Support for multiple versions of Oracle WebLogic Server (8.1, 9.x, 10.x). and, Continued support for Kodo/OpenJPA applications. 做为一个重要开发者和Eclipse组织的成员，oracle一直积极参与Eclipse社区的建设，目前Oracle参与或领导的项目有：JavaServer Faces (JSF) Tools. Dali Java Persistence Architecture (JPA) Tooling. BPEL Tools. Eclipse Data Tools Platform. and Eclipse Persistence Services (EclipseLink) 更多优质资料尽在百考试题论坛 百考试题在线题库 oracle认证更多详细资料 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
