Suddenly, the evening took a terrible turn². A bottle rocket shot into his eye, immediately causing him terrible pain. His family rushed him to the emergency room for treatment. As a result of the injury, Pete developed glaucoma and cataracts. Today, Pete has permanent vision loss in his injured eye because of his bottle rocket injury. June is Fireworks Eye Safety Awareness Month, and through its Eye Smart campaign the American Academy of Ophthalmology wants to remind consumers to leave fireworks to professionals. "There is nothing worse than a Fourth of July celebration ruined by someone being hit in the eye with a bottle rocket," said Dr. John C. Hagan, clinical correspondent for the Academy and an ophthalmologist at Discover Vision Centers in Kansas City. "A safe celebration means letting trained professionals handle fireworks while you enjoy the show." According to the U. S. Consumer Product Safety Commission, more than 9,000 fireworks related injuries happen each year. Of these, nearly half are head-related injuries, with nearly 30 percent of these injuries to the eye. One-fourth of fireworks eye injuries result in³ permanent vision loss or blindness. Children are the most common victims of firework abuse, with those fifteen years old or younger accounting for⁴ 50

percent of fireworks eye injuries in the United States. Dr. Hagan estimates that his practice sees more than 30 injuries each year from fireworks. Even fireworks that many people consider safe represent a threat to the eyes. For children under the age of five, apparently harmless sparklers account for one-third of all fireworks injuries. Sparklers can burn at nearly 2,000 degrees Fahrenheit. 词汇：

Fireworks n.烟火 professional n.专业人员 Glaucoma 凡.青光眼
abuse n.伤害 Cataract n.白内障 sparkler n.花炮 ophthalmology n.
眼科学 Fahrenheit n.华氏 注释：1.set off：点燃 2.took a terrible
turn：发生恶转 3.result in：导致 4.accounting for：(指数量)占

‘ 练习：1. What happened to Pete last Fourth of July? A He was
burned in a house fire. B He was caught in a rain. C He was injured
in a fight. D He was hit in the eye. 2. The American Academy of
Ophthalmology calls on consumers to_____. A celebrate the
Fourth of July with fireworks. B leave fireworks to professionals in
their celebrations. C stop celebrating the Fourth of July altogether. D
set off fireworks together with trained professionals. 3. How many
fireworks eye injuries occur in the US each year? A About 9,000. B
About 4,500. C About 1,350. D About 30. 4. Fireworks eye injuries
can result in each of the following EXCEPT_____. A
blindness. B permanent vision loss. C glaucoma and cataracts. D
head-related injuries. 100Test 下载频道开通，各类考试题目直接
