Think about that. In 44% of all river bodies and streams it's not safe to fish or swim. And yet industrial polluters continue to block legislation that would prevent mercury from polluting our water supplies and leaving children with debilitating diseases. Among the treasures of our land is water--fast becoming our most valuable, most prized, most critical resource. Water can be blessing if properly used--but it can bring devastation and ruin when left uncontrolled. People have a right to air that they and their children can breathe without fear. Many people have been ignorant of this environmental problem. Use cleaning supplies that don't pollute. Government cannot close its eyes to the pollution of waters, to the erosion of soil, to the slashing of forests. By using energy more efficiently in your daily activities, you'll not only reduce carbon dioxide emissions but also other emissions that contribute to air pollution and smog. 相关链接：1月雅思考试网友机经汇总 月刊 百考试题特别推荐雅思新手入门指导 2009年4月雅思考试最新信息整理 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
