Though ___(2)___, the women were volunteers and the pay was barely above the minimum wage. They were not allowed ___(3)___ during the tests, and they were expected to tolerate each others company at close quarters for the entire period. Among other things they had to stand pressure three times the force of gravity and carry out both physical and mental tasks ___(4)___ . At the end of ten days, they had to spend a further twenty days absolutely confined to bed, during which time they suffered backaches and other discomforts, and when they were finally allowed up, the more physically active women were especially subject to pains due to a slight calcium loss. Results of the tests suggest that women will have significant advantages over men in space. They need less food and less oxygen and they stand up to radiation better. Mens advantages ___(5)___, meanwhile, are virtually wiped out by the zero-gravity condition in space.
