E5\_c102\_563872.htm q. 1 : what system privilege is required to create a rollback segment ? 1. create database 2. create rollback segment 3. alter database 4. create segment 2 q. 2 : oracle

recommends this number of minimum extents in a rollback segment

1. 0 2. 1 3. 2 4. 3 3 q. 3 : oracle recommends that the following

segment size when creating a rollback segment 1. initial lt. next 4. none of the above 2 q. 4 : the optimal parameter for a rollback

segment should be set 1. large for long-frequently running

transactions, small for short transactions. 2. small for long-frequently

running transactions, large for small transactions. 3. small for all

transactions 4. large for all transactions 1 q. 5 : in case of system

failure, this type of segment is used to undo the changes 1. data segment 2. temp segment 3. redo segment 4. rollback segment 4 :

rollback segments are used to rollback information that has already

been applied to database. during recovery, the database is rolled forward and then backwards to a consistent state. q. 6 : this is a valid

storage parameter when creating a rollback segment 1. freelists 2.

optimal 3. partition 4. none of the above 2 q. 7 : madhu created a

couple of private rollback segments. what should he do now to make

them online automatically during startup 1. grant online during startup to the segments 2. add rollback\_segments=(rbs1,rbs2) in

parameter file 3. 0drop segments and recreate them as protected 4.

none of the above 2 q. 8 : which is true regarding rollback segments

1. system rollback segment cannot be put in an offline mode 2.  
tablespaces containing rollback segments with active transactions can  
be put in offline mode 3. all of the above 4. none of the above
