C Shopping is not as simple as you may think ! There are all sorts of tricks at play each time we reach out for that particular brand (品牌) of product on the shelf. Colouring , for example , varies according to what the producers are trying to sell. Health foods are packaged (包装) in greens , yellows or browns because we think of these as healthy colours. Ice cream packets are often blue and expensive goods , like chocolates , are gold or silver. When some kind of pain killer was brought out recently , researchers found that the colours turned the customers off because they made the product look weak and ineffective. Eventually , it came on the market in a dark blue and white package-blue because we think of it as safe , and white as calm. The size of a product can attract a shopper. But quite often a bottle doesnt contain as much as it appears to. It is believed that the better-known companies spend , on average , 70 per cent of the total cost of the product itself on packaging ! The most successful producers know that its not enough to have a good product. The founder of Pears soap , who for 25 years has used pretty little girls to promote (推销) their goods , came to the conclusion : “ Any fool can make soap , but it takes a genius (天才) to sell it. ” () 49.
