阅读下面的短文，文章中有5处空白，文章后面有6组文字，请根据文章的内容选择5组文字，将其分别放回文章原有位置，以恢复文章原貌。

Caribbean Islands What would you see if you took a cruise to the Caribbean Islands? Palm trees and coconuts (椰子)? White beaches and clear, blue ocean? Colorful corals (珊瑚) and even more colorful fishes and birds? You bet. There are thousands of islands in the Caribbean Sea. They are famous for their warm, tropical climate and great natural beauty. The Caribbean Islands form a chain that separates the Caribbean Sea from the rest of the Atlantic Ocean. (1) Many of the islands were formed by the eruption (爆发) of ancient volcanoes (火山). Others are low-lying coral islands that gradually rose from the ocean. The Caribbean Islands are known by several names. (2) The explorer Christopher Columbus called the islands the Indies in 1492 because he thought he was near the coast of India. Later, Spain and France called the islands the Antilles. There are four large islands in the Caribbean Sea. (3) These four islands are often called the Greater Antilles. Together, they account for about 90 percent of the land area of the Caribbean Islands. The rest of the Caribbean Islands are much smaller. (4) You can see why pirates such as the famous Blackboard sailed these waters. There are countless small islands to bury treasure or hide on. The weather of the Caribbean Sea is almost always warm and sunny.

Sandy beaches line the coasts of many islands. (5) Many tourists arrive on cruise ships. A But life on the Caribbean Islands is not always paradise. B The earliest name used by Europeans is the Indies, later changed to the West Indies. C They're like a long necklace that stretches between North and South America. D They are Cuba, Puerto Rico, Jamaica, and Hispaniola. E This is why millions of tourists visit the islands each year. F Some of these islands are no more than tiny slivers (小片) of exposed coral.
