训练二 阅读下面这篇短文，短文后有2项测试任务：(1)

第1"--4题要求从所给的6个选项中为第25段每段选择1个正确的小标题；(2)第5"--8题要求从所给的6个选项中选择4个正确

选项，分别完成每个句子。 Global Warming 1 Smoke is

clouding our view of global warming, protecting the planet from perhaps three-quarters of the greenhouse (温室) effect. That might sound like good news, but experts say that as the cover diminishes in coming decades, we are facing a dramatic increase of warming that could be two or even three times as great as official best guesses. 2

This was the dramatic conclusion reached last week at a workshop in Dahlem, Berlin, where top atmospheric scientists got together, including Nobel Prize winner Paul Crutzen and Swedish scientist Bert Bolin, former chairman of the UN's Intergovernmental Panel on Climate Change (IPCC). 3 IPCC scientists have suspected for a

decade that aerosols (浮质) of smoke and other particles from burning rainforest, crop waste and fossil fuels are blocking sunlight and counteracting the warming effect of carbon dioxide (二氧化碳)

emissions. Until now, they reckoned that aerosols reduced greenhouse warming by perhaps a quarter, cutting increases by

0.2~C. So the 0.6~C of warming over the past century would have been 0.8~C without aerosols. 4 But the Berlin workshop concluded

that the real figure is even higher--aerosols may have reduced global

warming by as much as three-quarters, cutting increases by 1.8~C. If so, the good news is that aerosols have prevented the world getting almost two degrees warmer than it is now. But the bad news is that the climate system is much more sensitive to greenhouse gases than previously guessed. 5 As those gases are expected to continue accumulating in the atmosphere while aerosols stabilize or fall, that means "dramatic consequences for estimates of future climate change", the scientists agreed in a draft report from the workshop. 1 Paragraph 2 2 Paragraph 3 3 Paragraph 4 4 Paragraph 5 A

Atmospheric Scientists B The Calculations Made at the Berlin Workshop C The Previous Calculations of the Effect of Aerosols D The Scientists' Agreement E The Authoritative Conclusion F

Greenhouse Gases 5 When the cover diminishes in the coming decades, temperature 6 The conclusion reached at the Berlin workshop 7 The Berlin workshop concluded that the real figure 8

The increase of greenhouse gases A will influence future climate change B was somewhat surprising C will rise rapidly D was known to . US all E was much higher than had been expected F will drop

dramatically gt. [点击查看答案](#) [相关链接](#)：2009年职称英语考试考前冲刺复习注意事项 2009年全国职称英语考试临考冲刺三大注意 2009年全国职称英语考试词典携带问题解答 100Test 下载频道开通，各类考试题目直接下载。详细请访问
