Now it seems there ' s a very real connection between the temperature people feel and the way they act toward others。我们会谈论某人有“冷酷的眼神”或“温暖的笑容”，而今看来，人们对温度的感受与他们对待别人的态度之间的确存在着某种联系。我要收藏 Science magazine reports on an experiment in which some students held a hot drink and others a cold one. Then a person was described to them. Later, the students were asked whether they would describe that person as good or bad. Those holding the hot cups were more likely to say positive things。《科学》杂志报道了一项实验。实验中，一部分学生手持热饮，另一部分则拿着冷饮，接着，有人向他们描述一个人，随后，学生们被问及此人的好坏。拿着热饮的学生更倾向于作出正面评价。 A second experiment using hot and cold therapeutic pads brought even clearer results. Students holding the hot pads were twice as likely as those with the cold ones to react to others in a positive way。第二个实验用的是冷热治疗垫，实验结果则更加明确。在倾向于对他人作出正面反应的人数中，手持热垫的学生大约是持冷垫学生的两倍。 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
