I am writing this letter to tell you that there are something wrong within the telephone bill last month. When I got the bill, I am astonished that it is much high than usual. In the months before, it costs me about \$100 per month. But in this month, it costs me about

\$200. I am sure that I am using the telephone too much. After I examined the bill, I found that there are something wrong about the oversea telephone service. e I have no relatives or business partners in Africa, but I found that there are many phone calls to Uganda! So there must be something wrong with your billing system. Here I will make a serious complaint. I think you do not want me to change to another telephone service company. So please check my bill and I want my money back. I am looking forward to your reply. Thank you for any help in advance. Best wishes to your business! Tom 2、有人说学生要先学general subjects , 应当等到17岁 , 他们知道自己该做什么的时候 , 才能开始学习special subjects。这个观点你支持吗 , 为什么 ? 我的答案 : Some people say that ... (把题目观点复述一下)。I totally agree this idea. Firstly, general subjects are the basement of other kinds of subjects. In our country, Chinese, math, physics are all general subjects. Without a systematic study of general subjects, one will face a lot of problem in this social life. For Example, if you had not studied math, when you wandering around a flea market, You will find that robbed by those cunning guys. Next, people are gifted differently. If you do not study the general subjects, maybe you will not find what you are really good at. When I was young, I like to read novels and I believe that I will be a writer. But after I have studied BASIC - a computer program language, also a general subject in my school, I found that I was so good at it that even I can use it to write a small computer game. I am a computer programmer now. Thanks god, I found what I was gifted. If I hadnt study BASIC, the general subject, maybe I was a

poor low-end writer now! Finally, peoples career must be related with their interest. It is happy to work on what you are interested in and get the payment at the same time. Without the study of the general subjects, maybe you will not find what you are interested in. To sum up, 再次强调主题, I will practise this kind of method on my child .
