

Oracle启动后对控制文件的依赖Oracle认证考试 PDF转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/622/2021_2022_Oracle_E5_90_AF_E5_c102_622685.htm

今天测试的时候纠正了一个错误的印象，一直认为如果当前控制文件被误删除，会导致实例关闭。而实际上，Oracle并不会结束当前的实例：
SQL> select * from dual. D - X SQL> cd /u01/oracle/oradata/db01

```
oracle:/u01/oracle/oradata/db01> rm control02.ctl
```

```
oracle:/u01/oracle/oradata/db01> select * from dual. D - X SQL> alter system checkpoint. System altered. SQL> alter system switch logfile. System altered. SQL> col name format a50 SQL> select * from v$controlfile_record_section. 0select * from
```

```
v$controlfile_record_section * 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
