A Women nowadays are stronger and smarter than they were 50 years ago , and they can expect to live longer. Japanese women , for example , can expect to live 82 years , which is the longest in the world. Just 50 years ago , Japanese women could expect to live only 54 years. Many women are working today. In Japan , 75% of women are working now , compared to 37% 50 years ago. The reason why so many women are working is that they ' re getting more education these days. The rate

of Japanese women going to junior college and universities is higher than the rate for men. In 1947 , the average Japanese woman got married at the age of 23. Today , the average age is 26. At the same time , divorce has increased by 50%. As for having babies , today the birth rate is only 1.5 babies for each woman. Fifty years ago , the birth rate was much higher , 4.5 babies. In a recent survey , Japanese women were asked whether they would choose to be a man or a woman in the future life. 65% said they would prefer to be born again as a woman.
