Questions(15 minutes) Directions: In this part there is a short passage with five questions or incomplete statements. Read the passage

carefully. Then answer the questions or complete the statements in

the fewest possible words. It isn't strictly true that one half of the

world is rich and the other half is poor. It's one-third that is very

rich and two-thirds that are very poor. People in the rich one-third

don't realize the enormous difference between them and the other

two-thirds. A very simple example is that a fisherman in South

America may be catching fish which is processed into pet food and

yet his own children are not getting enough protein for their bodies

to develop properly. Although a lot of the world's natural resources

like oil come from these poorer countries, we in the richer countries

are probably using sixty times as much of these resources as a person

in Asia or Africa. The richer countries are in a position to dictate the

supplies what kind of prices they are prepared to pay for these

natural resources. In some cases, the prices have gone down. In

others, they have remained steady. But the prices the richer countries

get for their own exports have continued to rise. So they are getting

richer and richer and the poorer countries are getting

poorer. Questions: S1. What is the actual condition of rich countries

and poor countries? \_\_\_\_\_ . S2. Is there great difference

between the rich countries and the poor countries? \_\_\_\_\_ . S3.

Who are using the greater part of the natural resources?\_\_\_\_\_.S4. How are the richer countries getting richer and richer?\_\_\_\_\_.S5. What is the best title for the passage?\_\_\_\_\_.S1. The fact is one-third is rich and two-thirds are poor.S2. Yes, there is tremendous difference between them.S3. The richer countries.S4. The prices of natural resources, keep raising of their exports.S5. Rich countries and poor countries. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 [www.100test.com](http://www.100test.com)
