下Oracle的数据文件 SQL> create tablespace ora_backup
datafile/dev/rora_backup size 500M. Tablespace created. 进行查看
确认 SQL> create user rman identified by rman default tablespace
ora_backup temporary tablespace temp 2 . create user rman identified
by rman default tablespace ora_backup temporary tablespace temp *
ERROR at line 1: ORA-00922: missing or invalid option 在此处出
错，原来是temporary打错，继续。 SQL> grant

connect,resource,recovery_catalog_owner to rman 2 . Grant
succeeded. 5.连接到数据库 SQL> exit Disconnected from Oracle
Database 10g Enterprise Edition Release 10.2.0.1.0 - 64bit
Production With the Partitioning, OLAP and Data Mining options \$
rman target zhiruicatalog rman/rman 这下应该可以了吧

Argument Value Description

----- target
quoted-string connect-string for target database catalog
quoted-string connect-string for recovery catalog nocatalog none if
specified, then no recovery catalog cmdfile quoted-string name of
input command file log quoted-string name of output message log
file trace quoted-string name of output debugging message log file
append none if specified, log is opened in append mode debug
optional-args activate debugging msgno none show RMAN-nnnn
prefix for all messages send quoted-string send a command to the

media manager pipe string building block for pipe names timeout
integer number of seconds to wait for pipe input checksyntax none
check the command file for syntax errors
